About Me

I am a full-stack web developer who enjoys making web apps for clients and businesses. I have expertise in front and backend development, and I can develop responsive and optimized web solutions according to the requirements. As a computer science graduate, I love solving problems and finding optimal solutions. I am always eager to learn new technologies and improve my skills.

Experience

CafeVista (Pvt) Ltd | Full Stack Web Developer (Laravel & Flask)   **30/4/2024 – 30/7/2024**

- Worked on the backend using Laravel and Flask.
- We have implemented user authentication and database operations.
- I created new pages using HTML, CSS, Bootstrap, Javascript, and React JS.
- I used MYSQL and MongoDB for data storage.
- It connected backend components with frontend.

LN Technologies | SEO/WordPress Developer   **25/3/2019 – 5/2/2020**

- Managed SEO and WordPress development.
- Design WordPress pages using WP Bakery Builder.
- Removed bugs from the site and made it user-friendly.
- Helped with HTML and CSS of the website.
