

Muhammad Asad Saleem

PHP Laravel Developer

Islamabad, Pakistan | 03390027801 | techasad786@gmail.com | [Portfolio](#)

I am a full-stack PHP Laravel developer who enjoys building websites and apps that are both fast and visually appealing. I create robust Laravel backends, connect them to frontends built with React, and ensure everything runs smoothly.

Experience

PHP Laravel Developer, SysTellex Inc.

Sept 2024 – Present

- Maintained and enhanced a custom CRM system, ensuring high performance and stability.
- Successfully migrated the CRM from Core PHP to Laravel, improving scalability and maintainability.
- Designed efficient and normalized databases using ERD modeling.
- Integrated RESTful APIs into React components for dynamic frontend interaction with the Laravel backend.
- Developed and integrated RESTful APIs for seamless communication with the React front-end.
- Utilized Laravel Eloquent ORM and Query Builder for database operations.
- Implemented secure JWT authentication and built custom middleware for access control.

Backend Developer, CafeVista (Pvt) Ltd

March 2024 – July 2024

- Developed and integrated Laravel APIs with React JS front-end components.
- Implemented user authentication and role-based access using Laravel.
- Designed and managed MySQL and MongoDB databases for scalable storage solutions.
- Built dynamic views using Blade templates and enhanced UI/UX with Bootstrap and Tailwind CSS.
- Improved page load speeds and SEO through performance tuning and optimized design.
- Gained a strong understanding of Laravel routing, middleware, controllers, and best practices.

Skills

Languages & Frameworks: PHP, Laravel, JavaScript, React JS

Web & UI Technologies: HTML5, CSS3, Tailwind CSS

Databases: MySQL, MongoDB

Tools & Platforms: Git, CPanel, Web Hosting/Deployment

Other: REST APIs, JWT Auth, Blade Templates, Postman, Eloquent ORM, MVC Architecture

Projects

Aixgen - CRM (Company Project)

[Live Link](#)

Aixgen is a CRM developed using React.js and Laravel. It helps companies integrate and streamline their business operations by allowing them to add employees, create sales records, manage reports, and use admin panels to monitor and analyze business growth.

Job Portal Full Stack Laravel Project - Client Project

[Github](#)

A full-featured web app developed using Laravel, Bootstrap, jQuery, and AJAX. It allows users to register, post jobs, and apply for opportunities posted by others.

Education

IQRA University Islamabad Campus – BS Computer Science

2024
