

MUHAMMAD ASAD SALEEM

Full-Stack Developer

Islamabad, Pakistan | 03030021926 | techasad786@gmail.com | [Portfolio](#)

Full-Stack Software (Backend Focus) Engineer with 2+ years of experience building scalable web applications, CRMs, and booking platforms. Skilled in designing RESTful APIs, modern front-end interfaces, and database architectures using Laravel, React, and Node.js. Experienced in working on real-world systems including hotel booking, flight booking, and car rental platforms. Strong focus on performance, scalability, and clean architecture.

Experience

Full Stack Developer, Purple Technologies

December 2025 – Present

- Developing and maintaining hotel booking, flight booking, and car rental platforms using React and Laravel.
- Building scalable RESTful APIs and integrating third-party services (payments, booking engines, etc).
- Managing complex booking workflows, availability systems, and pricing logic.
- Developed and integrated RESTful APIs for seamless communication with the React front-end.
- Improving UI/UX performance using modern React practices.
- Working on modular and reusable component-based architecture.

PHP Laravel Developer, SysTellex Inc.

SEPTEMBER 2024 – December 2025

- Successfully migrated the CRM from Core PHP to Laravel, improving scalability and maintainability.
- Maintained and enhanced a custom CRM system, ensuring high performance and stability.
- Designed efficient and normalized databases using ERD modeling.
- Developed and integrated RESTful APIs for seamless communication with the React front-end.
- Utilized Laravel Eloquent ORM and Query Builder for database operations.
- Implemented secure JWT authentication and built custom middleware for access control.

Full Stack Developer, CafeVista (Pvt) Ltd

JANUARY 2024 – JULY 2024

- Developed and integrated Laravel APIs with React JS and Vue JS front-end components.
- Implemented user authentication and role-based access using Laravel.
- Designed and managed MySQL and MongoDB databases for scalable storage solutions.
- Built dynamic views using Blade templates and enhanced UI/UX with Bootstrap and Tailwind CSS.
- Gained a strong understanding of Laravel routing, middleware, controllers, and best practices.

Technical Skills

Languages & Frameworks: PHP (Laravel), JavaScript (React, Node.js)

Web & UI Technologies: React.js, HTML5, CSS3, TailwindCSS, Bootstrap

Databases: MySQL, MongoDB, Database Design, ERD Modeling

Backend & APIs: Laravel, Node.js (Basic to Intermediate), REST APIs, JWT Authentication

Tools & Platforms: Git, Postman, Swagger, Composer, CPanel, Deployment, WordPress

Core Expertise: MVC Architecture, Middleware, Eloquent ORM, API Integration, Authentication Systems

Projects

Aixgen CRM (Company Project)

[Live Link](#)

Aixgen is a CRM developed using React.js and Laravel. It helps companies integrate and streamline their business

operations by allowing them to add employees, create sales records, manage reports, and use admin panels to monitor and analyze business growth.

Booking Platform (Purple Technologies)

Worked on real-world booking systems (hotel, flights, car rental). Implemented booking flows, APIs, and UI modules.

Job Portal Full Stack Laravel Project - Client Project

[Github](#)

Full-stack Laravel application with job posting and application system. Built using Laravel, jQuery, AJAX.

Education

IQRA University Islamabad Campus – BS Computer Science

2024
